EDUCATION

MSc Computer Science — Sep 2025 – Sep 2026
University of Birmingham · Classification: Distinction — *Birmingham, UK*

BA Economics — Sep 2015 – Jun 2019
Fu Jen Catholic University — *New Taipei, Taiwan*

SOFTWARE PROJECTS

MSc Dissertation — Multi-Agent Code Repair Empirical Study — Jun 2026 – Sep 2026
University of Birmingham — *Birmingham, UK*

- Ran 6,810 automated task-runs through a self-built LangGraph pipeline comparing five agent configurations, with a deterministic sandboxed executor, timeout handling and offline tests asserting no configuration could see another's state.
- Traced anomalies in around 43% of runs to a defect in the third-party scoring tool, rebuilt it, and validated the replacement with oracle and fault-injection tests.
- Measured the trade-off: direct execution feedback improved solve rate by 4.1 percentage points, while more complex layers gave no reliable gain at up to 4.2× the compute cost.

ReguLens — Compliance Early-Warning Platform — Jun 2026
UKFIN+ Hackathon, recognised by the judges — *London, UK*

- Built a FastAPI service and React dashboard over an LLM-driven pipeline processing 130,000+ complaint records, exposing live metrics and an escalation queue.

FlashLearn — CS Learning Platform — Jan 2026 – Apr 2026
University of Birmingham — *Birmingham, UK*

- Led the system architecture phase for a five-person Agile team, producing use-case, class and sequence diagrams.
- Hardened the platform against rainbow-table attacks with salted password hashing and Flask session management, and ran the team's Git/GitHub and Trello workflow across two sprints.

MyPocket — Personal Finance System — Mar 2025 – Sep 2025
Ministry of Labor, 900-hour programme — *Kaohsiung, Taiwan*

- Designed and built a complete personal finance system single-handedly, from data model and UML design to a deployed application covering transactions, budgets and savings goals.
- Served both a web client and a .NET MAUI mobile client from a single ASP.NET Core REST API.
- Implemented role-based access control with BCrypt-hashed credentials across Standard, Subscription and Admin tiers, plus an admin panel for user and subscription management.

EXPERIENCE

Software Engineering & AI Training — Feb 2023 – Sep 2025
Industrial Technology Research Institute and Ministry of Labor — *Canada and Taiwan*

- Completed a 350-hour AI & Big Data programme at ITRI with an LSTM stock-forecasting project deployed on AWS EC2, followed by a working-holiday year in Toronto, volunteering at Nuit Blanche and the TCS Toronto Waterfront Marathon.
- Returned to Taiwan for the Ministry of Labor 900-hour software programme (see MyPocket), tutoring privately alongside it.

Assistant Relationship Manager, Corporate Lending — Sep 2022 – Feb 2023
Bank of East Asia — *Taipei, Taiwan*

- Rebuilt internal risk reporting for a USD 120M corporate lending portfolio into a visual workflow, cutting preparation time by around 20%.

Audit Innovation Staff, Skills Development Hub — Sep 2021 – May 2022
Deloitte — *Taipei, Taiwan*

- Built VBA automation for a system migration across 50+ client entities, eliminating repeated manual reconciliation.

Citigold Acquisition Officer, Wealth Management — Dec 2020 – May 2021
Citibank — *Taipei, Taiwan*

- Conducted data-driven analysis of client portfolios to identify market opportunities and refine investment strategy, contributing 3–5% account growth per quarter.

TECHNICAL SKILLS & OTHERS

Backend: C#, ASP.NET Core MVC, .NET MAUI, Entity Framework Core, Python, FastAPI, Flask, RESTful API design, pytest
Frontend: JavaScript, React, HTML/CSS, responsive dashboard UI
Databases: PostgreSQL, MySQL, MSSQL, Azure SQL, Google Cloud SQL, schema and system design (UML)
Cloud & DevOps: Docker, GitHub Actions, CI/CD pipelines, Azure App Service, GCP Cloud Run, AWS EC2
Data & AI: pandas, scikit-learn, LLM orchestration (LangGraph), SQL analytics
Languages: English (advanced), Mandarin (native), Japanese (basic), Korean (basic)
Hobbies: Travelling (visited 20+ countries), Gym / Fitness, Badminton
